Intellectual Property licenses in cross-border insolvency: Lessons from In Re Qimonda

**M. P. Ram Mohan
Aditya Gupta**

November 2021

The main objective of the working paper series of the IIMA is to help faculty members, research staff and doctoral students to speedily share their research findings with professional colleagues and test their research findings at the pre-publication stage. IIMA is committed to maintain academic freedom. The opinion(s), view(s) and conclusion(s) expressed in the working paper are those of the authors and not that of IIMA.

Intellectual Property licenses in cross-border insolvency: Lessons from *In Re Qimonda*

M P Ram Mohan* & Aditya Gupta[‡]

Abstract:

Introduced in 2016, the Insolvency and Bankruptcy Code overhauled the Indian insolvency regime. *Five years young*, the work in progress Code is now in the process of adopting the *Cross-Border insolvency*, which was omitted from its original mandate. In 2018, a legislatively appointed committee suggested that the Code should adopt the UNCITRAL Model Law on Cross Border Insolvency. However, the Committee overlooked a crucial jurisprudential guideline, which coloured the interpretation of the Model Law, which was delivered in a cross-border insolvency dispute between American and German regimes. An American bankruptcy court subjected the German administration of American Intellectual Property assets to a protection exclusively available within the American Bankruptcy Code. This paper studies the American judicial decisions in the *Samsung v. Jaffe* dispute to identify and underline the importance of its directive. The study reveals that there is virtually no guidance on how an intellectual property license is treated within the Indian insolvency regime. The authors underline the importance of such guidance considering the proposed adoption of the Model Law and suggest legislative inquiry in the issue.

Introduction

Until 2016, the Indian insolvency and bankruptcy regime remained *multilayered and fragmented*.¹ In response to decades of suggestions for an overhaul of the insolvency regime,² the Indian Parliament enacted an umbrella legislation for insolvency resolution: The Insolvency and Bankruptcy Code, 2016 (IBC, 2016). IBC, 2016 reformed India's insolvency regime by substituting the multitude of operational bankruptcy laws, some of which dated as far back as 1924.³ The Code introduced a creditor-in-control regime, a time-bound resolution process and reduced the scope of juridical intervention.⁴

While the Code has been touted as “*one of the most progressive financial reforms in recent times*,”⁵ it was not designed to deal with issues related to cross-border insolvency. The first draft of IBC, 2016, was prepared by The Bankruptcy Law Reforms Committee (BLRC), set up by the Ministry of Finance to reform the Indian bankruptcy Regime.⁶ The BLRC explicitly noted that their recommendations are limited to insolvency and bankruptcy in so far as it is a “*purely domestic issue*.”⁷ When the bill was presented before the Joint Parliamentary Committee (JPC), they disagreed with the BLRC. The JPC noted that the Code must incorporate some manner of regulating cross-border insolvencies, “*not incorporating this will lead to an incomplete code*.” Deliberating on the manner of regulation, the JPC included an enabling mechanism on the suggestion from the Department of Economic Affairs, Government of India. The mechanism empowered the Central Government to enter into bilateral agreements with other countries for cooperation in cases of cross-border insolvencies.⁸

The enabling framework included in the IBC, 2016, encountered various problems when issues related to cross-border insolvency were brought to the attention of the Indian judiciary. In 2019, when JET Airways, an Indian Airlines company, entered insolvency proceedings, it had assets in two jurisdictions: India and Netherlands, and parallel insolvency proceedings were initiated in both jurisdictions.⁹ Owing to the lack of a robust cross border insolvency mechanism, the National Company Law Tribunal (NCLT) in June 2019 declared that the Dutch proceedings are a *nullity in the eyes of the law*.¹⁰ On appeal before the National Company Law Appellate Tribunal (NCLAT), the insolvency professionals, on direction from the NCLAT, entered into a ‘*Cross-Border Insolvency protocol*’ as a temporary solution.¹¹

The Jet Airways dispute underlined the requirement of a robust cross-border insolvency mechanism in India, and “*an imminent need was felt to fill the legislative gap*.”¹² The Insolvency Law Committee (ILC), constituted by the Government of India had, in 2018, highlighted that IBC, 2016 does not regulate cross border insolvencies and had approved the adoption of the UNCITRAL Model Law within IBC, 2016.¹³ The ILC did not deal with the rules and regulatory framework which enables the implementation of the Model Law. To prepare such a framework, the Ministry of Corporate Affairs constituted the Cross-Border Insolvency Rules/Regulations Committee (CBIRC) in January 2020.¹⁴ The Committee submitted its report on June 15, 2020,¹⁵ which was made publicly available on November 23, 2021.¹⁶

Apart from the judicial quandary, the linear growth of Foreign Direct Investment (FDI) in India also creates a strong argument favouring the adoption of robust Cross-Border Insolvency

guidelines.¹⁷ FDI Equity Inflow in India between April 2000 and June 2021 was \$547.2 billion. In 2016, India witnessed an inward FDI of \$39.97 billion, which rose by 26% to 50.61 billion in 2018.¹⁸ Even outward FDI from India has witnessed substantial growth, from \$8182.5 million in 2015-16 to \$12268 million in 2018-19.¹⁹ With the growing international investments and business transactions in India, cross-border insolvency issues are expected to emerge, and adoption of cross border insolvency law in some form seems imminent.

However, the introduction of cross-border insolvency regulations can be accompanied by a compelling set of procedural and implementational limitations. In and of itself, Insolvency Law is a meta law that, once activated, supersedes otherwise applicable laws.²⁰ Section 238 of the IBC, 2016, incorporates a comprehensive non-obstante clause. The provision overrides the mandate of any other law if such mandate is contrary to the provisions of the IBC, 2016.²¹

Therefore, domestic insolvency regimes are governed by an intersection of a diverse mosaic of legal rules.²² A convergence of such diverse legal rules can result in problematic conclusions. In 1985, the American Court of Appeals for the Fourth Circuit potentially disrupted the entire model of monetising intellectual property through licensing.²³ The damage was so pervasive that in 1988 the American Congress had to step in and denude the 1985 judgement from its precedential authority.²⁴

Marked divergences between domestic insolvency regimes further complicate such intersection and its implications in cross-border insolvency cases.²⁵ This is especially true in the case of Intellectual Property (IP) licenses, as there is no international guidance on the

treatment of IP licenses during bankruptcy,²⁶ a classic example of this is the *In Re Qimonda* dispute.

In 2011, Qimonda, a manufacturer of semiconductor chips, filed for insolvency before an insolvency court in Munich, Germany. When the German trustee requested the administration of American assets, citing the possible differences between German law and American law, an American Bankruptcy Court subjected the relief to the explicit protections made available to intellectual property licences by the Congressional intervention from 1988.²⁷ The decision from the Bankruptcy Court and its affirmation by the Court of Appeals in 2013 meant that the licensees of American patents would enjoy a dramatically different treatment from the treatment afforded to German licensees.²⁸

The present study identifies the jurisprudential concerns highlighted in the case of *Samsung v. Jaffe*.²⁹ The interpretation of American bankruptcy courts can substantially colour the understanding of the UNCITRAL Model Law, and therefore deserves the attention of other insolvency regimes. Further, the intersection of the American and German insolvency law highlights the lack of any international guidance regarding the treatment of IP licenses in bankruptcy. The authors analyse the treatment of IP licenses within the Indian regime, and its possible implications on the proposed cross border insolvency regulations.

Part 1 of the present study explains the dispute and contextualises it within the scope of the UNCITRAL Model Law. Part 2 examines the pitfalls of India's existing cross-border insolvency regime and analyses the proposed regulations in light of the current jurisprudence of the Model Law. Part 3 highlights the lack of a clear mandate on the treatment of IP licenses within the international instruments guiding cross-border insolvency. Part 3 also investigates the possible treatment of IP licenses in the IBC, 2016. Part 4 contextualises the *Qimonda* dispute within Indian insolvency law, and highlights the need for an administrative study of IP licenses within the Indian insolvency regime.

²⁸ ELINA MOUSTAIRA, INTERNATIONAL INSOLVENCY LAW: NATIONAL LAWS AND INTERNATIONAL TEXTS 5.2.1.1.3 (Elina Moustaira ed., 2019).

²⁹ The bankruptcy court has referred to the dispute as *In Re Qimonda*, while the Court of Appeals for the Fourth Circuit refers to this controversy as *Samsung v. Jaffe*. The authors have used these two terms interchangeably.

1. In Re Qimonda/ Samsung v. Jaffe

In January 2009, Qimonda, a manufacturer of semiconductor chips, initiated insolvency proceedings in Munich, Germany. Qimonda's principal assets comprised of 10000 registered patents, 4000 of which were registered in the USA. Given the existence of the bankrupt debtor's assets in a foreign jurisdiction, the proceeding assumed the nature of cross-border insolvency. The German trustee approached an American Bankruptcy Court to recognise the German proceedings and administration of the American assets.

Before dealing with the particulars of the dispute and the judicial decisions arising therefrom, this paper explains the underlying statutory mechanism responsible for the dispute.

1.1. Intellectual Property Licenses in the American Bankruptcy Code

The American Bankruptcy jurisprudence has a controversial history of dealing with IP licenses.³⁰ Multiple American judicial decisions, academic commentaries, and Congressional guidelines delineate the treatment of IP licenses during bankruptcy. Most such guidelines and decisions traced their connection back to Section 365 of the American Bankruptcy Code that allows a bankrupt debtor to reject onerous contracts entered into before the institution of bankruptcy proceedings.³¹

Subjected to repeated criticism,³² Section 365 intends to release the debtor from burdensome contractual obligations that impede successful reorganisation and liquidation.³³ Section 365 enables a bankruptcy estate to incorporate the contractual arrangements which offer a net benefit while contracts that can be detrimental to the estate are rejected.³⁴ Rejection of burdensome and onerous contracts reduces the prospective debts,³⁵ increasing the funds available to the bankrupt business.³⁶ The debtor can then restructure these funds into payments towards creditors in case of liquidation or reorganisation.

³⁶ *Id.* at 316.

While Section 365 is very broad in its ambit, the threshold requirement for its application is that a contract must be ‘*executory*.’³⁷ While the American Congress has not defined the term, there is sufficient academic and judicial opinion to create a workable definition.³⁸ The most used and widely accepted definition³⁹ was developed by Prof. Vern Countryman. According to the Countryman Analysis, ‘*a contract is executory if both parties have sufficient unperformed obligations so that either party’s discontinuance would constitute a material breach.*’⁴⁰

Most intellectual property (IP) licenses include continuing material obligations⁴¹ and therefore qualify as executory contracts.⁴² In 1985, the decision from the Court of Appeals for the Fourth Circuit in the case of *Lubrizol v. RMF*⁴³ dramatically distorted the meaning of rejection in reference to IP licenses. It led to an alarming disruption of the IP licensing landscape.⁴⁴

Richmond Metal Finishers had granted a non-exclusive patent licensing agreement regarding a metal coating process to Lubrizol. When Richmond filed for Chapter 11 Bankruptcy in 1983, they sought to reject the Lubrizol license by placing reliance on Section 365. The Bankruptcy Court allowed Richmond to reject the licensing agreement.⁴⁵ On appeal, the District Court held that the rejection would not benefit the bankruptcy estate and sided with Lubrizol.⁴⁶ The District Court opinion was overruled on appeal when the Court of Appeals allowed rejection of Lubrizol’s license.⁴⁷ In the court’s opinion, a rejection under Section 365 would not only freed a licensor from its prospective obligations but would also extinguish the licensee’s right to continue using the licensed intellectual property.⁴⁸ The court’s decision effectively meant

that rejection of an IP license during the licensor's bankruptcy would mean that rejection under Section 365 constitutes a complete rescission.⁴⁹

The decision from the Court of Appeals effectually rendered all the investments made by the licensee towards the exploitation of an intellectual property license sunk costs.⁵⁰ Upon rejection, the licensee's claim for damages would be unsecured,⁵¹ non-priority⁵² and dischargeable.⁵³ After *Lubrizol*, a licensor could use Section 365 and “reclaim intellectual property licenses in an effort to negotiate better terms.”⁵⁴ To safeguard their interests, licensees demanded security interests in the licensed intellectual property and insisted that the license agreements be structured as completed sales.⁵⁵

Owing to the market instability created as a result of the *Lubrizol* decision,⁵⁶ in August 1987, a bill designed to clarify the “right of the parties when a licensor or licensee declares bankruptcy”⁵⁷ was introduced before the American Congress.⁵⁸ Signed into law on October 18, 1988, the Intellectual Property Bankruptcy Protection Act (IPBPA) introduced Section 365(n) to the American Bankruptcy Law.⁵⁹ Section 365(n) served as a *veto power* in favour of the licensees, who now had the option to determine the effect of the licensor's rejection on an intellectual property license.⁶⁰ Upon rejection, a licensee can treat such a contract as terminated and rely on Section 365(g) to seek a remedy.⁶¹ Alternatively, the rights under the licensing

agreement could be retained by the licensee.⁶² With the introduction of Section 365(n), the *Lubrizol* decision was impeached of its precedential authority.⁶³

1.2. In Re Qimonda and IP licenses

The introduction of Section 365(n) through IPBPA, 1988 is significant to the string of judicial decisions in the *Qimonda* liquidation dispute. The bankruptcy court's decision identified Section 365(n) and the congressional intentions supporting its promulgation as *the fundamental public policy* of the United States.⁶⁴ The decision from the Court of Appeals also weaved the underlying concerns of IPBPA, 1988 within its decision.⁶⁵

After *Qimonda* filed for insolvency in Germany, the German trustee, Dr Jaffe, approached an American Bankruptcy Court. The requests made by Dr Jaffe were within the remit of Chapter 15 of the American Bankruptcy Code. Enacted in 2005, titled *Ancillary and Other Cross-Border Cases*,⁶⁶ Chapter 15 incorporates the Model Law on Cross Border Insolvency in the American Bankruptcy Code.⁶⁷ It provides “*a clear procedural framework for Courts dealing with bankruptcy of a multinational company, and it was intended to work with the fundamental United States policy and existing case law.*”⁶⁸ Chapter 15 makes very narrow and limited deviations from the Model Law.⁶⁹ Section 1515 of the Code allows a foreign representative to file a petition for recognition before an American bankruptcy court. Section 1521(a) allows the foreign representative to request additional relief from a foreign court.⁷⁰ Apart from an application for recognition, citing his entitlements under Section 1521(a)(5), Dr Jaffe also requested the administration of *Qimonda*'s American assets.

The bankruptcy court recognised the German proceedings as the foreign main proceedings.⁷¹ However, *Qimonda*'s licensees approached the bankruptcy court challenging the administration of American patents by the German bankruptcy proceedings. After an

evidentiary hearing, the court entered a supplemental order, where the German trustee was required to ensure that the protections available in Section 365(n) of the American Bankruptcy Code are made available to the American licensees.⁷² On appeal, the supplemental order was amended. The bankruptcy court ruled in favour of a central administration of the worldwide patent portfolio and opined that the protections of IP licenses would be a subject of litigation before the German insolvency proceeding.⁷³ Such amendment of the order meant that if the German law allowed Dr Jaffe to reject IP licenses, he could sidestep the protections legislated by the IPBPA, 1988.

On appeal to the District Court, the decision of the bankruptcy court was reversed and remanded.⁷⁴ The bankruptcy court was called upon to consider the interests of the licensees of American patents and determine if the violation of the relief granted in Section 365(n) would violate fundamental public policy.⁷⁵ On remand, the bankruptcy court, and subsequently the Court of Appeals for the Fourth Circuit, held that the protections legislated by the IPBPA, 1988 should be made available to the American licensees.⁷⁶ Dr. Jaffe even approached the United States Supreme Court to challenge the decision of the Fourth Circuit court. However, the Supreme Court denied the writ of certiorari arising in the judgement.⁷⁷

The significant findings from the judicial decisions are discussed hereinbelow:

1.2.1. Balancing the antithetical interests of creditors and debtors:

Section 1521 of the American Bankruptcy Code catalogues the reliefs available to a foreign representative after the recognition of a foreign proceeding. Section 1521 closely tracks the language of Article 21 of the Model Law. The provision entitles a court to entrust the debtor's assets to a foreign representative.⁷⁸ The discretion of the court under Section 1521 is subjected to Section 1522, which mandates that a discretionary relief can be granted only if "*the interests of the creditors and other interested parties, including the debtor, are sufficiently protected.*"⁷⁹

⁷⁷ *Jaffe v. Samsung Elecs. Co.*, , 2014 U.S. LEXIS 6583.

⁷⁸ MARTIN AND SPECKHART, *supra* note 72 at 72–74.

⁷⁹ 11 U.S.C. § 1521(b).

When Qimonda’s licensees approached the bankruptcy court citing the potential loss of their interests, the bankruptcy court opined that Section 1522(a) requires that the licensees be *sufficiently protected* even if it adversely affects the bankrupt debtor. On appeal, the Court of Appeals for the Fourth Circuit confirmed the interpretation of the bankruptcy court.⁸⁰ The Circuit Judge, Justice Niemeyer, held that before granting any relief under section 1521, the court must ensure compliance with the protections offered by section 1522. Section 1522 empowers the bankruptcy court to *subject* any relief granted under section 1521 “*to conditions it considers appropriate.*” Section 1522 requires a court to consider the interests of both creditors and debtors. Since the interests of the debtors and creditors can potentially be antagonistic, Section 1522 inherently calls for a *balancing test*. Support for this position was also found in the Guide to Enactment of the Model Law and judicial precedent dealing with Article 22 of the Model Law and Section 1522 of the American Bankruptcy Code.⁸¹

1.2.2. Public Policy Limitation:

Section 1506, along with Section 1521 and 1522 of the American Bankruptcy Court, serve as *safety valves*, allowing American Courts to protect the interests of the American creditors in a Chapter 15 insolvency proceeding.⁸² Section 1506 is an embodiment of Article 6 of the Model Law. It allows a bankruptcy court to “*refuse to take any action under Chapter 15 if such action would be manifestly contrary to the United States Public Policy.*”⁸³ However, the public policy exception should be invoked only in “*exceptional circumstances concerning matters of fundamental importance for the United States.*”⁸⁴

On remand, the bankruptcy court in *In Re Qimonda* cited the public policy exception to subject the relief sought by Dr Jaffe to the protections offered by Section 365(n) of the American Bankruptcy Code.⁸⁵ The bankruptcy court argued that failure to apply section 365(n) would *undermine the fundamental US public policy of promoting technological innovation*. Hence, the safety valve available under section 1506 was activated.

⁸⁴ NEIL FRANCIS HANNAN, CROSS-BORDER INSOLVENCY 80–83 (2017).

⁸⁵ IN RE QIMONDA AG, *supra* note 78.

The bankruptcy court studied the existing judicial precedents on the subject⁸⁶ and extrapolated three principles which guide the application of section 1506: “1) *mere conflict between the US law and the foreign law is not sufficient to trigger the public policy exemption*; 2) *deference should not be afforded to a foreign proceeding if its procedural fairness is in doubt and cannot be cured*; and (3) *an action should not be taken in a chapter 15 proceeding if where it would frustrate a US court’s ability to administer the chapter 15 case or would severely impinge on a US constitutional right.*”⁸⁷

The bankruptcy court’s interpretation of the public policy limitation received considerable criticism. Elizabeth Blunkel argued that the court in *Qimonda* failed to articulate how Section 365(n) constitutes *fundamental public policy* of the United States. She asserts that there may be multiple patent registrations, in different countries, over a single process or invention. Suppose each of these countries argues that their domestic policy best reflects their policy of technological innovation. In that case, it will lead to an inconsistent interpretation of the Model Law, which can, in turn, frustrate the “*general aims of comity*” expressed in the Model Law. Such an interpretation would suggest that the bankruptcy court conflated “*fundamental notions of public policy with statutory manifestations of current US policy.*”⁸⁸ Dr Hannan went as far as to suggest that the bankruptcy court’s decision “*is not a true interpretation*” of the public policy exception. He argues that the bankruptcy court’s decision is influenced by American economic concerns and the “*more political nature of the judges in the USA.*”⁸⁹ Alternatively, before the bankruptcy court gave its opinion, some scholars argued that the bankruptcy courts should interpret the public policy limitation to protect intellectual property licensees. The primary argument such scholars align with is that promoting intellectual property growth should certainly qualify as *fundamental public policy* of the United States.⁹⁰

Both of these interpretations have merit. However, the judicial precedent and its international resonance seem to tilt in favour of the latter interpretation. For the authors in the present study to side with any of the interpretations, it would require a detailed analysis of *what constitutes fundamental US public policy?* Such an analysis is beyond the scope of the present study.

2.1. Existing Regime

IBC 2016, as it stands today, does not substantively deal with issues relating to cross-border insolvencies.⁹¹ The Bankruptcy Law Reforms Committee (BLRC) noted that their recommendations are limited to insolvency and bankruptcy in so far as it is a “*purely domestic issue*.”⁹² However, the Joint Parliamentary Committee (JPC), which reviewed a draft of the IBC, believed that the implication of Cross-Border insolvency could not be ignored for a very long time. Referring to provisions regulating cross-border insolvency, JPC noted that “*not incorporating this will lead to an incomplete code*.”⁹³ However, instead of incorporating comprehensive statutory guidelines on the subject, only two provisions were included, dealing with cross border insolvency issues in a *cursory manner*.⁹⁴

Section 234 of IBC, 2016 enables the Government of India to enter into *reciprocity agreements* with other countries.⁹⁵ Section 235 applies when the assets of the corporate debtor are situated in a foreign jurisdiction.⁹⁶ In such a case, the insolvency professional can submit an application to the NCLT stating that evidence or action in reference to assets is required in connection with a proceeding within IBC, 2016.⁹⁷ However, to make such a request, the foreign country and India should have entered into a reciprocal arrangement in terms of Section 234.⁹⁸ On being satisfied with the insolvency professional’s request, the NCLT may issue a *letter of request* to a competent court in the foreign jurisdiction.⁹⁹

IBC, 2016 heavily relies on the Indian government to enter into bilateral agreements. While the two provisions acknowledge the issues arising out of cross-border insolvency, they “*postpone consideration of substantive provisions on cross-border insolvency to bilateral agreements*.”¹⁰⁰ Such reliance on bilateral arrangements is misplaced as there are multiple

challenges in creating such agreements.¹⁰¹ Firstly, negotiating such bilateral agreements may require intense negotiations, which can be time-consuming.¹⁰² Secondly, each country may require different sets of provisions, potentially resulting in further fragmentation of the Indian cross border insolvency regime.¹⁰³ Since the adoption of the Code in 2016, the Government of India has not entered into any bilateral agreements within Section 234.¹⁰⁴ This in itself is a testament to the inherent issues with the existing mechanism.

Regardless of the inherent problems with the existing mechanism, the incidence of cross-border insolvency issues has been steadily increasing in India. In fact, Prof. Moustaira traces the first cross-border insolvency protocol to have entered into in case of cross-border insolvency between India and England.¹⁰⁵ Dating back to 1908, the case involved an involuntary liquidation proceeding of an Anglo-Indian merchant and a banking partnership.¹⁰⁶ The two jurisdictions involved were India and England. In order to ensure the best results, the administrators from the two jurisdictions agreed that “*if there were surplus sums, they would be remitted to the other proceeding, so that all creditors could be satisfied.*”¹⁰⁷ Despite such lineage, the Indian insolvency regime lags far behind other jurisdictions as far as cross border insolvency issues are concerned.¹⁰⁸

In 2019, the State Bank of India filed an application before the NCLT Chandigarh for initiating insolvency proceedings against SEL Manufacturing Company Ltd.¹⁰⁹ After the insolvency proceedings were initiated, the Indian insolvency practitioner approached the US bankruptcy court for the District of Delaware for recognition of Indian insolvency proceedings.¹¹⁰ The US court recognised the Indian proceedings as the *foreign main proceedings* within the meaning

of Section 1502(4) of the American Bankruptcy Court.¹¹¹ This was the first instance where a foreign court recognised Indian insolvency proceedings.¹¹²

A similar issue arose during the Jet Airways insolvency dispute, which highlighted how ill-equipped IBC, 2016 is to deal with cross-border insolvency issues. After the NCLT declared that the Dutch proceedings are a nullity in the eyes of law,¹¹³ the NCLAT directed the administrators to explore the possibility of cooperation between the two proceedings.¹¹⁴ The administrators from the two jurisdictions came up with the *terms and conditions* of their cooperation, and labelled it as “*Cross-Border Insolvency Protocol*.”¹¹⁵ By an order dated September 26, 2019, the NCLAT mandated compliance with the protocol, and held that it should be treated as a “*direction of this Appellate Tribunal*.”¹¹⁶ Largely modelled on the UNCITRAL Model Law, the protocol defined the terms of cooperation between the two insolvency courts. Given that Jet Airways was an Indian company, the protocol recognised India as the *centre of main interest*.¹¹⁷ The decision of the NCLAT to recognise and enforce the insolvency proceedings according to the *Cross-Border insolvency protocol* was appreciated by some practitioners and academicians.¹¹⁸ However, the adoption of the Protocol and its eventual recognition should not be treated as a potential solution for any cross-border insolvency issues that may arise in the future.¹¹⁹

The Standing Committee on Finance, on March 4 2020, noted that past disputes involving issues related to cross-border insolvency have resulted in “*uncertain recoveries for creditors*.” The Committee noted that a bill regulating such issues should be introduced *as soon as possible*.¹²⁰ Depending on judicial precedents without the guidance of statutory instruction is

“likely to inspire less confidence in global investors seeking to work with India Inc.”¹²¹ A statutorily directed cross border insolvency framework can “reduce a great deal of uncertainty, unnecessary work and process, and potential points of tension.”¹²²

Protocols, such as the one entered into during the *Jet Airways* dispute, can be relied on to accommodate the possible conflicting objectives of different insolvency regimes. The CBIRC suggested that the NCLT should acknowledge the possible inconsistencies in the substantial insolvency laws of each jurisdiction and “build provisions in the protocol to achieve the maximum possible cohesion in the steps taken by the foreign representative and the IP (Insolvency Professional) in dealing with the insolvency of the corporate debtor.”¹²³

2.2. ILC Report/ Proposed Regime

Apart from the recent judicial controversy, the requirement of updating the cross-border insolvency framework of the Indian insolvency regime has been highlighted by multiple administrative committees. The Eradi Committee Report of 2000 suggested the adoption of the UNCITRAL Model Law, noting that the adoption of the Model Law will “facilitate international trade.”¹²⁴ This opinion was reiterated in 2002 by the NL Mitra Committee.¹²⁵ However, when the BLRC was preparing a draft of the IBC, issues related to cross-border insolvency were identified as the “next frontier.”¹²⁶ It was only in October 2018 that substantive provisions related to cross-border insolvency regulation were suggested.¹²⁷

The Insolvency Law Committee was appointed in 2017 to “take stock of the functioning and implementation of Insolvency and Bankruptcy Code, 2016 and identify the issues that affect the efficacy of the corporate insolvency resolution and liquidation framework.”¹²⁸ In March 2018, ILC noted that the IBC, 2016 in its current form does not “provide an overarching framework for insolvency involving assets, creditors or parallel proceedings in foreign jurisdictions.”¹²⁹ Underlining the global recognition and acceptance of the Model Law, ILC prepared its draft regulations based on the Model Law template. The regulations, labelled by the Committee as

‘Draft Code Z,’ are essentially an amended version of the Model Law.¹³⁰ Some important elements of the ILC draft regulations suggested by ILC are discussed below.

2.2.1. Scope

ILC noted that since the applicability of the Code does not extend to personal insolvencies and is limited to corporate debtors, the applicability of the cross border insolvency provisions should also be limited to corporate debtors.¹³¹ The CBIRC in their report identified that two sets of businesses, financial service providers and companies providing critical infrastructure or utility services, should be exempted from the applicability of cross-border insolvency regulations.¹³²

The ILC identified that the definition of ‘corporate debtor’ requires an amendment to ensure that the companies outside India can approach the NCLT for cooperation and recognition of foreign proceedings. The suggested amendment includes foreign companies within the definition of a *corporate debtor*.¹³³ The CBIRC studied the viability of this amendment in further detail. It suggested that the Central Government should commission a study to investigate the amendments required to the IBC, 2016, and the Companies Act, 2013, to ensure that then provisions of the OBC can be made available to foreign companies.¹³⁴

Further, ILC adopted the reciprocity requirement in the cross-border insolvency regulations.¹³⁵ Clause 1(4) of the proposed regulations provides that the cross border insolvency provisions would apply only to countries that have either adopted the Model Law or if the Central Government extends the application of the Model Law to any other country.¹³⁶ The requirement of reciprocity is absent in the American Bankruptcy Code¹³⁷, the English insolvency regime¹³⁸ and other insolvency statutes from New Zealand, China, Japan, Serbia, Montenegro and Poland.¹³⁹ Countries such as Mexico¹⁴⁰ and South Africa¹⁴¹ have adopted reciprocity

requirement. Without dealing with the substantive reasons for incorporating the reciprocity requirement, ILC noted that the requirement could be diluted with the growing experience of implementing the Model Law.¹⁴²

The inclusion of the reciprocity requirement can be potentially controversial.¹⁴³ After conducting a thorough investigation of the national statutes incorporating the reciprocity requirement, Prof. Yamauchi noted that the reciprocity requirement “*leaves us with that same lack of predictability and potential and fairness that the Model Law was seeking to alleviate.*”¹⁴⁴ Countries can cite the reciprocity requirement to deny recognition to proceedings and judgements and result in *stalemates and retaliatory actions*.¹⁴⁵ This observations has important lessons for India.

2.2.2. Recognition of Foreign Proceedings

Provisions dealing with recognition of foreign proceedings are a vital part of the Model Law.¹⁴⁶ Chapter III of the Model Law enables a foreign representative to apply for recognition of foreign proceedings¹⁴⁷, the manner of recognition¹⁴⁸ and the effect of recognition of foreign proceedings.¹⁴⁹ Clause 12(1) of the proposed ILC draft regulations traces the language of Article 15 of the Model Law and empowers a foreign representative to apply to the NCLT for the recognition of foreign proceedings.¹⁵⁰

The Model Law lays down an objective criterion for the recognition of foreign proceedings.¹⁵¹ Article 17 of the Model Law provides *jurisdictional pre-conditions*, upon fulfilment of which, a court must recognise the foreign proceedings.¹⁵² The reliance on pre-conditions reduces the discretion available to a bankruptcy court.¹⁵³ Similar provisions have been included in the

Model Law. Clause 15(1) of the ILC draft regulations provides that as long as the foreign proceeding complies with the definition of the term ‘proceeding,’ the foreign representative is a person or body and the application meets the requirements set out in Clause 12, NCLT shall recognise the foreign proceeding.¹⁵⁴ The ILC was cognizant of that the NCLT does not have any discretion in recognising the foreign proceedings, and therefore suggested that the NCLT be provided with an additional 30 days to decide an application for recognition.¹⁵⁵

2.2.3. Centre of Main Interests (COMI)

ILC draft regulations allow NCLT to recognise foreign proceedings as either foreign main proceeding, or as foreign non-main proceedings.¹⁵⁶ While making this distinction, the concept of Centre of Main Interests (COMI) assumes importance,¹⁵⁷ and becomes *fundamental to the operation of the Model Law*.¹⁵⁸ The Model Law identifies a foreign main proceeding as the location where the debtor’s *centre of main interests* lie.¹⁵⁹ An inconsistent application of the Model Law’s principles on identifying COMI can result in inconsistent recognition of foreign main proceedings. If different jurisdictions subscribe to different tests in identifying COMI, the entitlements associated with the recognition of foreign main proceedings will not be consistently distributed.¹⁶⁰ Thus, leading to forum shopping and jurisdictional conflicts with each different court recognising a different proceedings as the COMI.¹⁶¹

The jurisdiction where the debtor’s *main interests* lie is recognised as the foreign main proceeding.¹⁶² Following Article 16(3) of the Model Law, Clause 14 of the ILC draft regulations provides a rebuttable presumption that the COMI of the debtor will be where the registered office of the corporate debtor lies.¹⁶³

ILC admitted that this provision could be surreptitiously used, resulting in forum shopping by the corporate debtor. The Model Law places the onus on domestic courts to identify the abuse

of process by the corporate debtor.¹⁶⁴ To provide some safeguards against the abuse of process, ILC relied on the EU regulations¹⁶⁵ and included a 3-month look-back period in Clause 14. If the corporate debtor has moved its registered office to another country within three months before initiating insolvency proceedings, the presumption will cease to assume effect.¹⁶⁶ In such a case, ILC recommended that the place of *central administration*, that is readily ascertainable by the creditors should be recognised as the COMI.¹⁶⁷ In case the place of *central administration* is not ascertainable, ILC suggested that the list of *indicative factors* such as the location of financing and the location of the debtor's book and records should be consulted.¹⁶⁸ The CBIRC suggested an alteration to such a hierarchical manner of identifying the COMI. It identified a list of *indicative factors*, and suggested that the identification of the place of *central administration* cannot be dissociated with the adjudication of such additional factors. Therefore, the CBIRC argued in favour of identifying the place of *central administration* by reference to the additional *indicative factors*.¹⁶⁹

2.2.4. Reliefs for a foreign proceeding

Once an application for recognition is filed, Article 19 of the Model Law allows a foreign representative to apply for interim relief even before the foreign proceedings are recognised. Discretionary upon the court's decision, interim relief includes staying the execution of debtor's assets, entrusting the administration or realisation of debtor's assets who either by their nature or otherwise are perishable, susceptible to devaluation or otherwise in jeopardy.¹⁷⁰ Unless extended by the court, interim relief terminates on the recognition of the foreign proceeding.¹⁷¹

Citing the example of IBC, 2016, which does not provide interim relief during CIRP, ILC recommended that there is precedent for the misuse of the power to apply for interim relief. Therefore, ILC recommended that a discretionary interim relief should not be included in the regulations.¹⁷²

¹⁷¹ Article 19(4), UNCITRAL Model Law on Cross-Border Insolvency.

¹⁷² INSOLVENCY LAW COMMITTEE, *supra* note 15 at 13.1-13.4.

Article 20 of the Model Law provides that, upon recognition, an automatic moratorium shall be applicable. ILC adopted this provision and recommended that a moratorium similar to the one imposed by Section 14 of the IBC, 2016 be applicable upon recognising foreign proceedings.¹⁷³ While the Model law allows the courts to modify or terminate the scope of this moratorium,¹⁷⁴ ILC omitted this provision from their set of recommendations.¹⁷⁵

Apart from the mandatory relief, the Model Law also empowers the courts to provide *discretionary relief* regarding foreign main and non-main proceedings. Article 21 of the Model Law provides an inclusive list of reliefs that a foreign representative can request.¹⁷⁶ Modelled on Article 21, ILC recommended the adoption of Clause 18, which empowers the foreign representative to apply to the NCLT for discretionary relief.¹⁷⁷ However, the ILC noted that this power should be used sparingly and only in cases “*where the need for such relief is clearly established and the interest of domestic creditors are protected.*”¹⁷⁸

The manner in which discretionary relief should be administered was a point of contention in *Qimonda* dispute.¹⁷⁹ The recommendations of ILC regarding Article 21 of the Model Law provisions assume particular importance to the present study as sections 1521 and 1522 of Chapter 15 of the American Bankruptcy Code are American iterations of Article 21 and 22 of the Model Law.¹⁸⁰

ILC’s recommendation that discretionary relief should be used *sparingly* is in consonance with the international jurisprudence of Article 21.¹⁸¹ However, the Committee did not make a reference to the balancing test, used in the *Qimonda* case, which is an integral part of the application of Article 21.¹⁸²

2.2.5. Public Policy exception

Article 6 of the Model Law creates a safeguard in favour of the enacting state. Citing Article 6 a company can deny any action which has been requested by a foreign insolvency

¹⁷³ See, Clause 17, *Id.* at 14.2, 14.3.

¹⁸² See: UNITED NATIONS COMMISSION ON INTERNATIONAL TRADE LAW, *supra* note 155 at 196–199.

administrator. However, in order to deny any relief, Article 6 requires the court to establish that the proposed action is *manifestly contrary to the public policy of the enacting state*.

In making this exception, UNCITRAL did not define the term ‘*public policy*.’ The Guide to Enactment acknowledges that the interpretation of *public policy* would vary from state to state, and therefore it should not be defined by the Model Law.¹⁸³ Pointing towards the use of the term *manifestly*, the Guide to Enactment highlights that the provision should be interpreted restrictively and should only be invoked in exceptional circumstances.¹⁸⁴

Given the importance of this provision and its intersection with the remaining provisions in a cross-border insolvency regime, different countries have incorporated different versions of Article 6 in their domestic legislation. Some nations such as Australia, UK and USA have retained the term *manifestly*, whereas Canada, Mexico and Greece have omitted it.¹⁸⁵ In order to limit the applicability of the exception, Japan and Poland have replaced the term *public policy* with *public peace* or *public order*.¹⁸⁶

ILC recommended a verbatim adoption of Article 6. Citing examples from US judicial decisions, the Committee noted that the public policy exception should be exercised narrowly and used sparingly.¹⁸⁷ The ILC draft regulations allow the NCLT to invite submissions from the Central Government if it believes that a proposed action can be *manifestly contrary* to the public policy. If the NCLT does not issue a notice, the proposed regulations empower the Central Government to approach the NCLT *suo moto* if it believes that a proposed action is in violation to the state’s public policy.¹⁸⁸ It has been pointed out that the Central Government may use its power to issue *suo moto notices* based on “*populist perception or in regard to domestic considerations*.”¹⁸⁹

While discussing the possible interpretation of the public policy principle, ILC cited the experience from international jurisprudence,¹⁹⁰ specifically *Samsung v. Jaffe*.¹⁹¹ ILC cited the

decisions of the bankruptcy court¹⁹² and the Court of Appeals¹⁹³ in *Samsung v. Jaffe*, as valid applications of the public policy exception.¹⁹⁴ It was explicitly noted that the three principles developed by the bankruptcy court in *In Re Qimonda*, largely guide the analysis of the public policy exception.¹⁹⁵ Since the Indian insolvency regime does not legislate explicit protections for intellectual property licensees, ILC's reliance on the judicial decisions in the *Qimonda* dispute is interesting.

The next section highlights the lack of international guidance on the subject of IP licensing in bankruptcy. It also examines the Indian insolvency regime to determine the possible treatment offered to intellectual property assets during an Indian licensor's bankruptcy.

3. Lack of a clear mandate on IP licensing during bankruptcy

Unlike American law on the subject, Indian law does not legislate explicit protections for intellectual property licensees.¹⁹⁶ Further, unlike American judicial decisions, such as *Lubrizol*,¹⁹⁷ *In Re Exide*¹⁹⁸ and *Tempnology*,¹⁹⁹ the Indian judiciary has not yet had an opportunity to decide on an issue of IP licensing in bankruptcy. Hence, there is a lack of judicial and legislative guidance about the treatment of IP licenses within the Indian insolvency regime.²⁰⁰

Partial blame for the lack of any guidance can be accrued to the fact that the Indian Insolvency regime does not incorporate a power as broad and as far-reaching as the power of rejection incorporated in section 365 of the American Bankruptcy Code.²⁰¹ Furthermore, the international projects governing contractual relationships have failed to provide any guidance on the appropriate treatment of IP licenses. This essentially creates a vacuum in international guidance on the recognition and enforcement of IP contract archetypes.²⁰²

²⁰² Tosato, *supra* note 27 at 1255–1256.

The growing ubiquity of IP *transactions* in contemporary global and domestic business transactions has consistently supplanted business enterprises that primarily depend on the sale of goods.²⁰³ The growth in the number of IP registrations is a primary indicator of this growing ubiquity: In 1993-94, the Indian intellectual property (IP) office registered 1318 patents,²⁰⁴ which grew to 5978 registrations in 2014-15,²⁰⁵ and 15283 registrations in 2018-19.²⁰⁶ Designs, trademarks and copyright registrations have also followed a similar growth trajectory.²⁰⁷ The business environment aided by IP *transactions* can flourish only when the governing regulatory framework is predictable and consistent regarding IP *licensing transactions*.²⁰⁸ To achieve this objective, various stakeholders of the process have proposed ameliorations and adjustments to the international licensing framework.²⁰⁹

Presently, the domestic regimes governing the regulation of IP *licensing* are dominated by an intersection of many distinct legal rules, including competition law, bankruptcy law, contract law, labour laws and consumer protection laws.²¹⁰ Section 365 of the American Bankruptcy Code is an example of this mosaic of interconnected domestic regulations which alter the IP licensing landscape.²¹¹ This is further complicated by the *marked divergences* between different national insolvency regimes.²¹² The issues which were discussed in *Samsung v. Jaffe* are a prime example of how these marked divergences affect the interaction between domestic insolvency regimes.

UNCITRAL has also expressed interest in addressing the legal framework responsible for initiating, maintaining, and concluding effective IP licensing transactions.²¹³ The UNCITRAL

General Assembly in July 2013, requested its secretariat to prepare a study to “*identify the desirability and feasibility of the Commission preparing a legal text with a view to removing specific obstacles to international trade in the context of intellectual property licensing practices.*”²¹⁴ In July 2015, in its 48th Session, the Commission reiterated that they might consider the viability of a license on IP licensing after a colloquium or expert group meeting.²¹⁵ However, none of these formulations have assumed finality.²¹⁶

3.2. Treatment of IP Licenses in the Indian insolvency regime

3.2.1. During Liquidation

IBC, 2016 empowers a bankruptcy trustee to disclaim any *onerous property* of the bankrupt estate.²¹⁷ The right to disclaim onerous property first appeared in English insolvency law in 1869.²¹⁸ Section 23 of the UK Bankruptcy Act, 1869 provided that a disclaimer would *determine the relationship*. Any person injured by the disclaimer would be *deemed a creditor of the bankrupt to the extent of such injury, and may accordingly prove the same as a debt under bankruptcy.*²¹⁹ A similar description of a disclaimer can be traced back to the present iteration of the English²²⁰ and the Indian insolvency law.

The power of a bankruptcy trustee to disclaim unprofitable contracts is the closest enunciation to Section 365 of the American Bankruptcy Code.²²¹ *Onerous property* includes any unprofitable contract or any property which cannot be disposed of for value.²²² In its present form, a disclaimer ends any liability of the bankrupt estate arising from *onerous property*.²²³ Any person who sustains a loss due to the disclaimer shall be deemed a creditor of the bankrupt estate to the extent of the loss.²²⁴ Any person who claims to have an interest in the disclaimed

²²⁴ Section 160(4), Insolvency and Bankruptcy Code, 2016.

property can approach the NCLT challenging the disclaimer.²²⁵ The provision allowing disclaimer is designed to reject the performance of contracts, the maintenance of which is unprofitable and can potentially result in depletion of the pool of assets available to a bankrupt estate.²²⁶ A substantial difference between Section 365 of the American Bankruptcy Code, and the power of disclaimer is that disclaimer operates exclusively in reference to liquidation and has no bearing in cases of Corporate Insolvency Resolution Process.²²⁷

Similar to the term *rejection*, even the term *disclaimer* does not have an obvious contract law analogue. The lack of a clear mandate on the meaning of rejection and the lack of a clear contract law analogue has been the subject of judicial confusion and yielded “*wasteful litigation, observed results and dramatic distortions in bankruptcy law.*”²²⁸ The bankruptcy courts have often conflated the meaning of the terms’ *rejection*’ and ‘*termination.*’²²⁹ A primary example of this confusion is the case of *Lubrizol v. RMF*, which led to the enactment of the IPBPA, 1988.²³⁰

Does lack of a contract law analogue mean that disclaimer can also distort the bankruptcy law? Given the lack of substantial guidance from the Indian judiciary, it is difficult to answer the question within the Indian insolvency context. However, since the provision traces its lineage from the English insolvency law, and given that the language applied by both statutes is identical,²³¹ we can rely on the interpretation of the provision by the English insolvency courts.

In 1997, the House of Lords explained the effect of disclaimer in the following terms:²³²

“Disclaimer will, inevitably, have an adverse impact on others: those with whom the contracts were made, and those who have rights and liabilities in respect of the

property. The rights and obligations of these other persons are to be affected as little as possible. They are to be affected only to the extent necessary to achieve the primary object: the release of the company from all liability. Those who are prejudiced by the loss of their rights are entitled to prove in the winding up of the company as though they were creditors.”

The decision of the House of Lords has assumed prominence and has since followed and applied in multiple disputes.²³³ Applying the court’s opinion in cases of intellectual property licenses, a disclaimer of an intellectual property license during the liquidation of the licensor should only apply to the extent of releasing the bankruptcy estate from its foregoing obligations. The right of the licensee to continue using the licensed intellectual property, in so far as it does not affect the foregoing interests of the bankrupt licensor, should not be affected.

3.2.2. During CIRP

IBC, 2016 allows a bankrupt debtor to avoid some transactions and empowers a modification and alteration of transactions during CIRP. Since the power of disclaimer does not extend to CIRP, this section examines the extent up to which interference is warranted by IBC, 2016 during CIRP.

IBC, 2016 legislates avoidance powers regarding four *vulnerable transactions*: preferential transactions,²³⁴ undervalued transactions,²³⁵ extortionate credit transactions²³⁶ and transactions defrauding creditors.²³⁷ The avoidance powers are a statutory acknowledgement that there may be a considerable time period between the management of the corporate debtor realising that the corporate entity is heading towards insolvency and insolvency proceedings being initiated. During this time, the management may be inclined to strategically place a few creditors in a comparatively advantageous position than the other.²³⁸ To ensure that the interests of creditors are sufficiently protected, “*the bankruptcy law allows the ex-post alignment of incentives between factually insolvent debtors and their creditors.*”²³⁹ These avoidance powers are

²³⁹ Aurelio Gurrea-Martinez, *The Avoidance of Pre-Bankruptcy Transactions: An Economic and Comparative Approach*, 93 CHICAGO-KENT LAW REVIEW 711, 713 (2018).

essentially “*retrospective adjustment of pre-petition transactions*” and allow a bankrupt debtor to claw back the assets that the corporate debtor’s management has surreptitiously distributed.²⁴⁰ Avoidance provisions are a part of many modern insolvency laws.²⁴¹

However, the avoidance powers apply to a very limited set of corporate transactions and multiple statutory guidelines limit the scope of their application.²⁴² For example, preferential and undervalued transactions made in the *ordinary course of business* cannot be avoided.²⁴³ Further, if a transaction was entered into two years prior to the initiation of insolvency proceedings, it cannot be avoided.²⁴⁴ Apart from these myriad statutory guidelines, avoidance powers are designed to counter fraudulent transactions and fraudulent preference to a specific creditor or group of creditors.²⁴⁵ The Bankruptcy Law Reforms Committee further limited the scope of these provisions when they submitted that vulnerable transactions “*fall within the category of wrongful or fraudulent trading by the entity or constitute unauthorised use of capital by the management.*”²⁴⁶ Therefore, while avoidance transactions allow interference with pre-petition transactions, they are limited to a very specialised segment of corporate transactions.

This is in stark difference between avoidance powers, and Section 365 of the American bankruptcy code. This position is further buttressed by the fact that the American bankruptcy code explicitly legislates a set of avoidance powers.²⁴⁷ Compared to avoidance powers, the mandate of Section 365 is very far extensive and far reaching. It allows the reduction of businesses’ prospective liabilities, which can, in turn, increase the value of the underlying assets. For example, if a patent licensing agreement is onerous of the option of the licensor, it can potentially reduce the saleable value of the underlying patent. Reducing the onerous licensing arrangements can therefore help a licensor assume a better value of the IP asset. This position has been approved by administrative committees, both in India, and internationally.

²⁴⁶ *Id.* at 101–103.

²⁴⁷ 11 U.S.C. § 548, 547, 544(b); RODRIGO OLIVARES-CAMINAL ET AL., *DEBT RESTRUCTURING* 27–34 (1 ed. 2011).

In 2005, a committee empowered by the Ministry of Corporate Affairs explicitly aligned with this position. The Committee noted that provisions which provide for interference “*would assist in achieving the objectives of the insolvency process. The power is necessary to facilitate taking appropriate business and other decisions including those directed at containing rise in liabilities and enhancing the value of assets.*”²⁴⁸ In 2016, even the World Bank noted that “*to achieve the objectives of the insolvency proceedings, on the system should allow interference with the contract where both parties are not fully perform their obligations.*”²⁴⁹

Therefore, a resolution professional during CIRP should be allowed to interfere with onerous pre-petition contractual arrangements. The legislature can either, extend the power of disclaimer to CIRP proceedings, or a specific set of provisions modelled on section 365 of the American Bankruptcy Code should be enacted. Such amendments should take cognisance of their possible interaction with intellectual property licenses, and specific protection should be legislated where required.²⁵⁰

4. IP licenses during Indian insolvency and the need for administrative enquiry

Having understood the Model Law and the judicial discourse related to treatment of IP licenses in cross-border insolvency, the authors now study the issues highlighted by the *Samsung v. Jaffe* dispute within the Indian Insolvency regime. What happens if an Indian insolvency professional approaches an American bankruptcy court for recognition of Indian insolvency proceedings, and administration of American IP assets?

Before addressing this question, it must be underlined that unlike American bankruptcy jurisprudence, the Indian legislature and judiciary has not addressed the concerns of IP licensing in bankruptcy. There is little to no guidance on the subject, and the findings of the authors are largely tentative.

Addressing whether an Indian insolvency professional would be able to secure unencumbered access to administration of American IP assets would largely depend on two questions: Firstly, which proceedings are sought to be recognised? If the Indian proceedings sought to be recognised are liquidation proceedings, then the statutory instruction on the subject is largely clear. A disclaimer, in most circumstances, should not affect the ability of the licensee to continue using the licensed IP. Alternatively, if a corporate insolvency resolution proceeding

(CIRP) is sought to be recognised, the issue of rejection loses relevance. As our analysis indicates, the power of an insolvency professional to interfere with IP licenses during CIRP is very specialised. None of the discussed powers are comparable to Section 365 of the American Bankruptcy Code. Therefore, in either of these instances a licensee's ability to continue using a bankrupt licensor's IP, should not be affected.

However, owing to the lack of explicit legislative guidance on the subject, this conclusion can be easily dismantled. One such instance, can arise when American IP rights are subjected to exclusive licensing agreements. The law on disclaimer explicitly states that a disclaimer shall affect the rights of the licensee "*so far as is necessary for the purpose of releasing the corporate debtor, and the property of corporate debtor.*"²⁵¹ A licensing agreement which includes an exclusivity covenant limits the licensor's ability to monetise and exploit the subject IP right. Such a covenant can create subsisting and continuing liabilities. It is possible that a disclaimer may frustrate the exclusivity requirement of a licensee. Such treatment would be in stark contrast with the American Law on the subject. Section 365(n)(1)(b), explicitly provides that an exclusivity covenant can be enforced by the licensee if he decides to retain the license post rejection.²⁵² Therefore, while the Indian insolvency regime is largely compliant with the protections offered by Section 365(n), there can be nuanced situations where this compliance would be called into question.

The Indian insolvency regime is on the precipice of adopting cross-border insolvency regulations. In August 2021, the Secretary to the Ministry of Corporate Affairs informed the Standing Committee on Finance that "*The cross-border insolvency is on the priority list and we are working on it. Very soon we will be drafting the legislative part.*"²⁵³ The Ministry and any affiliated bodies should remain mindful of the possible impediments to the implementation of cross border insolvency regulations. The present study underlines that there is a glaring gap in judicial, legislative, and administrative direction regarding the treatment of IP licenses in bankruptcy. This gap can lead to problematic conclusions when cross border insolvency regulations are put to the test. An administrative study should identify the potential problems of IP licensing in bankruptcy, and legislative interventions should be made to fill the gap in existing law.

5. Conclusion

The insolvency law and its intersection with intellectual property exploitation reveals a curious deficiency: There is virtually no international guidance on the treatment of intellectual property licenses during bankruptcy. Some jurisdictions such as America have substantively dealt with this issue, while others such as India provide no discernible guidelines, legislatively or otherwise. Such *marked divergences* in insolvency legislations of different countries, can result in problematic conclusions. An area where the lack of such harmonisation becomes an important concern is cross-border insolvency. The issue manifested itself in the *Qimonda* dispute, where the intersection of American and German insolvency law resulted in a dramatically different treatment between the American and the German creditors. The authors underlined the importance of the *Qimonda* guidelines, and studied them within the context of the Indian insolvency regime. The study revealed that the treatment afforded to intellectual property licensees by the Indian and the American bankruptcy law is largely in compliance with one another. However, owing to the lack of any judicial, administrative, or legislative guidance, or any policy-based motivations within the Indian insolvency law, this conclusion is only tentative. There can be many situations which can potentially disrupt this compliance. One such instance that the authors highlight is the possible repugnancy between the Indian and the American bankruptcy law in relation to exclusive intellectual property licenses.

The Indian insolvency regime is on the cusp of adopting cross-border insolvency regulations. The CBIRC explicitly acknowledges that there can be possible repugnancies between the insolvency laws applicable in *concurrent* proceedings. The Committee suggested that the insolvency professionals, with guidance from NCLT, can enter into protocols that accommodate the possible statutory inconsistencies between different regimes.²⁵⁴ However, without any clarity on how Indian insolvency law treats IP licenses, the approach that can be taken for preparing, regulating and enforcing protocols would remain largely speculative in this particular respect. Further, given the express acknowledgement of the Indian legislative bodies on the international character of insolvency proceedings, it is imperative for the Indian insolvency law to regulate the treatment of intellectual property licenses in insolvency. Therefore, the authors suggest administrative inquiry of the issue, in order to avoid any confusion in cases of cross-border insolvency where the treatment of intellectual property licenses constitutes a substantial concern.
