Project Management

August 26-31, 2019

Introduction

Project Management is the science and art of managing the business of an organization and the growth of a nation by translating strategy into successful action. While quite a few Indian projects have achieved outstanding performance and even set international records, Project Management in India still has tremendous scope for improvement. A study by the Ministry of Statistics and Programme Implementation estimates the cost and time overrun in projects at INR 187,524 crores (USD 30 billion). One of the reasons that India lags behind China in economic development is the absence of professional project management culture and also Certified Project Managers.

Realising the need for a relevant programme in Project Management, IIMA started offering Executive Education in Project Management in 1985 and has trained over 2325 executives in this area. The focus of the programme has been on the Implementation Phase – the key area for the success of projects. Besides retaining the focus on the implementation phase of projects, the current programme also includes one session on Project Risk Management.

Objectives

- To develop an understanding of the tools and techniques for effective management of resources and cost in projects
- To expose participants to the behavioural aspects of project management
- To provide an insight into the network-based project monitoring system
- To discuss various aspects related to contract management, project costing, budgeting and other related topics
- To acquaint participants with project uncertainty and risk management

Programme Highlights

- Overview of project management, different stages of a project and slippages in projects.
- Network Techniques: Activity, events, drawing of networks, critical path, float, methods to find critical path.
- PERT: Uncertainty, estimation of activity time, network simulation, project completion probability.
- Public Private Partnership Projects.
- Project Resource Planning: Resource aggregation, resource profile, resource smoothing.

- Behavioural Aspects in Project Management: Project organisation structure, management of project personnel motivation, project manager's role, etc.
- Project Monitoring: Hierarchy of networks, reporting formats, reporting frequency, reporting of cost and work value, rescheduling of projects.
- Contract Management and Legal Aspects: Specification of contracts, criteria for awarding contracts, follow-up and coordination, FIDIC Contracts.
- Project Risk Management: Composite impact factor, composite likelihood factor, risk time, risk cost, expected value method, variation, foreseen and unforeseen uncertainties.
- Discussion on some excellent project management cases in India.
